NITE BEAM PRODUCTS

Safety isn't just a precaution; it's the foundation of every mission. For Law Enforcement, Roadway Workers, Fire Departments, Utility Companies, Public Works Depts., Tow companies, and more, being seen and protected isn't just about following protocol—it's about saving lives. Nite Beams makes every effort to enhance visibility and awareness ensuring that those serving on the front lines make it home safely.

Together, we are building a future where road workers are safer and motorists are warned well in advance of entering a work zone.

Nite Beams

Nite Beams products are designed and manufactured with the objective of enhancing personal visibility and safety in low-light and high-risk environments. However, no product, including those sold by Nite Beams, can completely eliminate the risk of accidents, injuries, or fatalities. While the use of our products may significantly increase visibility and the likelihood of accident prevention, it is critical to understand that Nite Beams products do not guarantee the avoidance of accidents or the preservation of life in every situation.By purchasing or using Nite Beams products, the user acknowledges and agrees that these products are intended to supplement, not replace, existing safety practices, and should be used in conjunction with all applicable safety regulations, common sense, and proper care. Nite Beams makes no representations or warranties, express or implied, regarding the absolute effectiveness of any product in preventing accidents or injuries.

Users are responsible for complying with all safety laws, regulations, and best practices in their respective jurisdictions. Nite Beams disclaims any liability for any injury, loss, or damage arising out of the use, misuse, or inability to use its products. Additionally, Nite Beams' Road Commander and Cone Commander products have their patents pending, ensuring innovative designs to address roadway safety challenges while reinforcing our commitment to quality and originality.

A **small investment** could save a person's life and **save** your company, city, county, state, **millions of dollars**. Just one prevented accident in the next 20 years provides a great return on your investment in safety. **The unwanted and preventable accident could happen in the next hour.**

ABOUT

Founded in 2010, headquartered in Kalamazoo, Michigan. Nite Beams has been the leader and proud provider of high visibility safety products, while pushing the limits of roadway safety programs through innovation.

For over 100 years reflective tape has been the norm for enhanced visibility, it simply doesn't provide enough ample time for visibility, especially in many weather conditions.

Nite Beams are a game changer in the roadway safety world. Our patented products are designed and manufactured with strict requirements to enhance visibility/ safety of any roadway and awareness of work zones regardless of weather conditions.

The Nite Beams team takes great pride providing you with products that have a proven track record and our endorsed by Law Enforcement, Fire Depts., Energy suppliers, DOT, Towing companies, Road Builders, Airport and Port Authorities, Trucking Industry and other industries.

It's our DNA to create the best Personal Protection Equipment (PPE) safety products, make Nite Beams part of your DNA safety program.

A **small investment** could save a person's life and **save** your company, city, county, state, **millions of dollars.** Just one prevented accident in the next 20 years provides a great return on your investment in safety. **The unwanted and preventable accident could happen in the next hour.**

ROAD COMMANDER™

Nite Beams Road Commander was the vision of our founder Mike "Tonto" Alexander. After studying the existing road flares available on the market, Alexander realized they were inadequate. Alexander talked with law enforcement, DOT employees, tow operators, and district fire departments while developing The Road Commander. Alexander stated " I knew I could create a product that would address all of the shortcomings of existing flares on the market and create a much safer environment for anyone working in traffic. I wanted to save lives and prevent accidents."

1 **JUSTIN LAURIA #244 , PATROL LIEUTENANT**
VILLAGE OF LINCOLN WOOD POLICE DEPARTMENT

Our department has equipped all squad cars with Nite Beams LED road flares, and they have become an essential tool for traffic management. We use them regularly at crash scenes, where their bright, highly visible lights significantly enhance officer safety and improve traffic flow. These flares are durable, reliable, and incredibly effective, making them a vital addition to our safety equipment.

2 **BRAD KENNEDY, POLICE CAPTAIN**
REDFORD TOWNSHIP POLICE DEPT.

We purchased several Road Commander Road Flare kits with tripods from Nite Beams™ for a trial run with our Traffic Bureau with excellent results. The Flare kits have extremely high visibility in the day time as well as the night. These Nite Beams Flare kits have been used on numerous major crash scenes including fatality crashes. We are able to free up patrol cars on crash scenes now due to being able to set out these long lasting and bright Flares. This product has high visibility from long distances and increases the safety of the public and of our Officers while they are investigating crashes. We are very pleased with the Road Commander Road Flares from Nite Beams. I am so happy with the product that I have just placed an additional order for more of the Road Commander Road Flares for our Road Patrol.

3 **CAPT. MIKE BROWN, DISTRICT COMMANDER**
MICHIGAN STATE POLICE

We used the Road Commander last week. They were great! They moved 90% of the traffic over without a patrol car on a crash site on Interstate-94.

and thousands of satisfied customers!

ROAD COMMANDER™

FEATURES & ADVANTAGES

- VISIBLE UP TO 1 MILE IN BOTH DIRECTIONS
- IP 65 RATED, DURABLE, MILITARY GRADE CASING
- 24HRS RUN TIME WITH BACK UP SOLAR PANELS FOR ADDITIONAL RUN TIME OR CHARGING
- TRIPOD LEGS CAN BE CLOSED FOR PLACING IN TOP HOLE OF ORANGE CONES FOR ELEVATED VISIBILITY
- 50,000HRS OF L.E.D's LIFE (MEANING YOU COULD USE THE ROAD COMMANDER FOR 12HRS A DAY CONTINUOUSLY FOR 11 YEARS AND 4 MONTHS).
- USB TYPE-C CHARGING CORD INCLUDED
- 5 SINGLE COLOR SETTINGS: RED, GREEN, AMBER, BLUE and WHITE

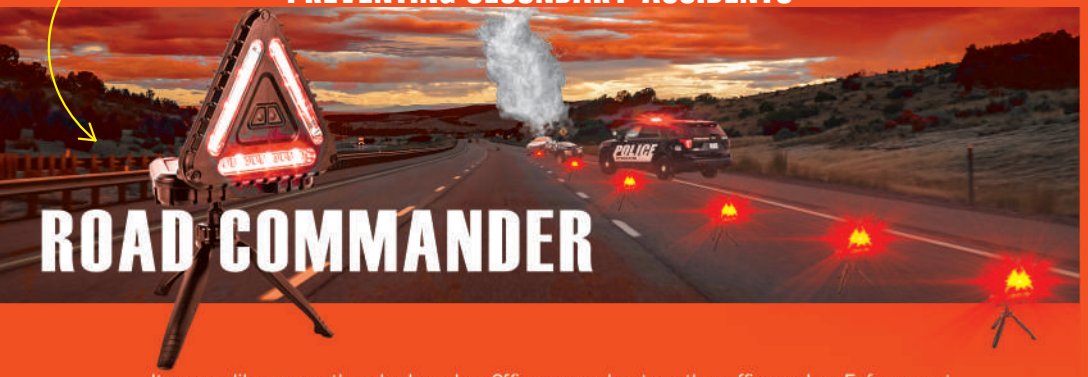
TODAY'S TECHNOLOGY

THE SOLUTION TO PREVENTING SECONDARY ACCIDENTS



It seems like every other day I read on Officer.com about another officer or Law Enforcement vehicle being struck by a motorist. This doesn't have to happen!
Motorists need ample warning time to slow down and move over. That is why I designed the Road Commander.

FREE UP YOUR ASSETS

SECURE A SAFE WORK ZONE

ROAD COMMANDER

Road Commanders greatly enhance the safety of all Law Enforcement plus their equipment, and are now being used by Law Enforcement throughout the US to ensure roadway safety. Road Commanders are used to shut down traffic lanes, manage special events, and warn motorists of incidents ahead. Other users include the Department of Transportation, Public Works, the Towing Industry, Airport Authorities, and Construction Firms are just some of our customers, across the U.S. and Canada.

These products will save lives while protecting your assets and reducing accidents.

BEST SOLUTION

ROAD COMMANDER

  USABLE UNDER ANY CIRCUMSTANCES
- ONE-TIME INVESTMENT + GREAT R.O.I
- 50,000 HOURS OF LED LIFE (MEANING YOU CAN USE THE ROAD COMMANDER FOR 12HRS A DAY CONTINUOUSLY FOR 11 YEARS AND 4 MONTHS.
  QUICK SET UP + PROGRAMMABLE LED
- LED COLOR CHOICES

RYAN GAGNON, DEPUTY CHIEF OF POLICE
AUBURN HILLS POLICE DEPT., AUBURN HILLS, MICHIGAN

The 'Road Commander' LED flares produced by Nite Beams have dramatically improved the safety and visibility of our officers in the field. I put these in the hands of our officers, and they immediately deploy them on crashes, both day and night, on over 10 miles of freeway that runs through our community. What I did not expect is these have been a force multiplier when having to shut down roads. A five-pack of 'Road Commander' flares can take the place of a patrol car to block a road and improve the efficiency of resources in the field.

JOHN ELLSWORTH, CHIEF OF POLICE
WOLVERINE LAKE POLICE DEPARTMENT

I wanted to take a moment to let you know how impressed I am with your 'Road Commander' package of 5 lights with a carrying case, which I purchased in the spring of 2022. In fact, I bought four sets—one for each of our patrol vehicles. After receiving them, I was immediately impressed with their brightness and durability. Initially, there was some skepticism among the staff about replacing traditional flares, so we decided to test the lights for durability and battery life.

We set them to 'strobe' mode in red and blue and left them in our garage overnight on a Thursday. By Friday morning, they were still going strong, and they had even caught the attention of our DPW staff, who were so impressed that they decided to purchase additional sets for their vehicles. Since then, our officers have used them at festivals, accident scenes, downed power lines, and other events where we would normally use flares that require constant monitoring.

These lights have proven to be an exceptional value—they've saved us money because, unlike traditional flares, they are reusable, rechargeable, and always ready at a moment's notice. In my 38 years of law enforcement, few changes have made such a meaningful impact on the daily lives of officers working the road. I can't tell you how many uniform pants I've ruined over the years from flare burn holes, but with the Road Commander lights, that's now a thing of the past. Thank you for creating such an outstanding product!

THE SOLUTION!!

CONE COMMANDER

Cone Commanders greatly enhance the safety of anyone working on roadways and their assets. Cone Commanders are used to shut down traffic lanes, manage special events, and warn motorists of incidents ahead. Our customers include state DOTs, Fire Depts., Law Enforcement, Public Works, the Towing Industry, Airport Authorities, and Construction Firms are just some of our customers, across the U.S. and Canada.

This product will save lives while protecting your assets and reducing accidents.

Proud winner of National PWX Best New Product of the Year 2025 Award at National PWX Conference/expo, Chicago, ILL.

PWX PUBLIC WORKS EXPO CHICAGO

HALL OF FAME PRODUCT

CONE COMMANDER™

HALL OF FAME PRODUCT

Following the great success of the Road Commander, the Cone Commander was designed to address the limitations of traditional orange traffic cones. After consulting with DOT officials, law enforcement, fire departments, and tow truck operators, Alexander identified the need for a more effective solution to improve roadway safety. The Cone Commander provides enhanced warnings for motorists, encouraging them to slow down and move over, reducing accidents and creating a safer work environment. With alerts visible from all four directions, it minimizes accidents, cuts insurance claims, reduces cone replacement costs, and delivers a quick return on investment (R.O.I.).

1 **JOSEPH I. BAILEY, SUPERVISOR & AIRFIELD ELECTRIC**
ORLANDO INTERNATIONAL AIRPORT

This is the most versatile light I have ever used with safety cones. It deploys effortlessly and offers multiple lighting color options and sequencing patterns. I work for the Aviation Authority at Orlando International Airport, and when we perform electrical work on the airfield at night, compliance with FAA regulations regarding closures is critical. This fantastic tool not only ensures our safety but also enhances the safety of the traveling public.

The best part? This setup eliminates the need for heavy, water-filled barricades, saving valuable time for the task at hand. In summary: safety-enhancing, versatile, rapid deployment, faster setup, and no more cumbersome barricades.

2 **NICK ROSCOE, PRESIDENT**
DR. HOOK TOWING SERVICES

Good day Tonto. Dr Hook Towing Services attends to over 100,000 requests for roadside assistance annually. Our fleet of over 100 towing and recovery units of all sizes operates 24/7/365. Each vehicle is equipped with a set of Nite Beams.
As like all roadside workers, our operators and trucks are always at risk as most motorists pay little or no attention to the standard yellow. Warning lighting that is activated at each roadside incident is critical. The number of near misses at the side of the highways is very concerning and substantial. All operators are equipped with approved safety vests for awareness to passing motorists. Drivers establish a safe work zone using Nite Beams and traffic cones. To date, nothing we deploy to increase motorist awareness and operator safety comes close to your Nite Beams lighting.
Currently, we have over 100 sets in use. We have been using these lights for the last 18 months and are happy to report that near misses and collision incidents have not occurred. Our operators utilize the Red/Blue configuration on the lights, and when deployed on the roadways, our operators report that they are a game changer in raising awareness to passing motorists.This product should be on every vehicle that works on the roadways. Thank you for developing the Nite Beams product.

and thousands of satisfied customers!

ZONE COMMANDER™

OUR NEWEST PRODUCT

The Zone Commander™ continues the legacy of innovation inspired by the vision of our founder, Mike 'Tonto' Alexander. He addressed outdated or lack of illumination on barricades, orange barrels and other work zone devices and created the Zone Commander™.

The Zone Commander™ can be secured to almost any type of barricade and visible from all directions, creating a much needed safer work zone.

Alexander believes alerting motorists earlier via illumination before entering work zones will give motorists ample time to slow down and move over. Zone Commander™ will reduce accidents and fatalities, which we all want.

Joseph W. Gregory, Chief of Department
Albany Fire Department
Albany, New York

The Albany Fire Department purchased 18 WorkLight Commanders which we distributed and placed in service on our ladder companies and service division apparatus.
These work lights were critical, almost immediately, after placing them in service during back-to-back vacant building fires. The portability and easy of use were extremely helpful to our members, as the enhanced a safe operation around the fire ground.
As we are currently utilizing the WorkLight Commander, we found it to be extremely useful to our operations.

VISOR LIGHT

LAW ENFORCEMENT SERIES

The initial idea of this product came to me from a conversation I had with a Sheriff's Deputy in Chattanooga, Tennessee. He purchased two of our products and stated he needed better lighting in his patrol car, but wished the lighting would be red, making it hard for anyone to see him in the car while performing duties. Another benefit, when exiting vehicle, red lighting doesn't require any readjustment to darkness. In tactical situations where seconds count, this feature keeps Law Enforcement safer. We utilized Red LED technology—standard in military, aviation and water vessels contexts. Why? because it preserves the eye's natural night vision.

Unlike white light, red light doesn't need immediate readjustment to darkness. Now with our Visor Light having a magnetic base and White lighting for photography, Law Enforcement can document with pictures any evidence placed on hood of vehicle while illumitaring the immediate area and any person being detained, creating a safer environment. Equipped with a magnetic base and a secondary White LED's, the portable Visor Light allows officers to easily document evidence on the hood of a vehicle or perform standard tasks safer and with clear visibility.

PRO SERIES

Born from Duty, Built for the Road, The Pro Series VisorLight is the direct evolution of our Law Enforcement series. While the original design was forged from a conversation with Law Enforcement regarding the need for stealth and night vision, we realized that the public could use this product due to poor interior lighting in vehicles.

Portable versatility for every driver just like its tactical predecessor, the Pro Series is equipped with our signature magnetic base. This feature allows commercial drivers and vehicle owners to instantly remove from visor and attach the light to any metal surface where lighting is needed, e.g. a wheel well for changing a tire, luggage unloading, or any poor light situation, etc; the clips allows hanging from visor or vehicle window. It offers the same rugged portability and industrial-grade safety as the Law Enforcement series, simplified for your daily demands.

While Law Enforcement series requires Red LED technology for tactical stealth. We removed the tactical Red lighting feature to optimize maximum visibility for civilian and commercial use. Pro Series focuses the power entirely on brilliant White LED lighting, providing the clarity needed for any inadequate lighting or picture taking situation.

WORLD'S BEST
LED STOP PADDLE

CROSSING GUARDS' FIRST CHOICE

Hand-held LED lighted stop paddles are designed to enhance safety by protecting children, crossing guards, and road personnel, effectively commanding the attention of oncoming drivers in all weather conditions. These lightweight, two-sided paddles prominently display "STOP" in large, highly visible letters highlighted by ultra-bright white LEDs, which can operate in either steady-on or flashing mode. For added visibility, the paddles are equipped with 3M Diamond Grade reflective sheeting, ensuring exceptional reflective brightness both day and night. To maximize battery life, the LEDs automatically turn off when the paddle is lowered. Powered by a rechargeable lithium-ion battery pack, these paddles provide over 12 hours of continuous flashing on a single charge, making them a reliable and efficient safety tool.

ITEM # SP01

WE KNOW HOW GREAT OUR PRODUCTS ARE, BUT DON'T JUST TAKE OUR WORD FOR IT!

READ THE TESTIMONIALS WE RECEIVE REGULARLY.

BRAD KENNEDY, POLICE CAPTAIN
REDFORD TOWNSHIP POLICE DEPARTMENT

We purchased several Road Commander Road Flare kits with tripods from Nite Beam Products™ for a trial run with our Traffic Bureau with excellent results. The Flare kits have extremely high visibility in the day time as well as the night. These Nite Beams Flare kits have been used on numerous major crash scenes including fatality crashes. We are able to free up patrol cars on crash scenes now due to being able to set out these long lasting and bright Flares. This product has high visibility from long distances and increases the safety of the public and of our Officers while they are investigating crashes. We are very pleased with the Road Commander Road Flares from Nite Beams. I am so happy with the product that I have just placed an additional order for more of the Road Commander Road Flares for our Road Patrol.

CAPT. MIKE BROWN, DISTRICT COMMANDER
MICHIGAN STATE POLICE

We used the Road Commander last week. They were great! They moved 90% of the traffic over without a patrol car on a crash site on Interstate-94.

JEFFREY GETTY
REGIONAL SAFETY MANAGER
ARCHER WESTERN

As a large road builder, one of the biggest hazards our employees face is working near live traffic. To be proactive, we ordered some of your LED hard hat bands—and wow, what a difference in visibility! They are lightweight and last the entire shift. That's why I just ordered several more. Thank you for providing such a great product that helps protect our workers.

JOHN ELLSWORTH
CHIEF OF POLICE
WOLVERINE LAKE POLICE DEPARTMENT

I wanted to take a moment to let you know how impressed I am with your 'Road Commander' package of 5 lights with a carrying case, which I purchased in the spring of 2022. In fact, I bought four sets—one for each of our patrol vehicles. After receiving them, I was immediately impressed with their brightness and durability. Initially, there was some skepticism among the staff about replacing traditional flares, so we decided to test the lights for durability and battery life.

We set them to 'strobe' mode in red and blue and left them in our garage overnight on a Thursday. By Friday morning, they were still going strong, and they had even caught the attention of our DPW staff, who were so impressed that they decided to purchase additional sets for their vehicles. Since then, our officers have used them at festivals, accident scenes, downed power lines, and other events where we would normally use flares that require constant monitoring.

These lights have proven to be an exceptional value—they've saved us money because, unlike traditional flares, they are reusable, rechargeable, and always ready at a moment's notice. In my 38 years of law enforcement, few changes have made such a meaningful impact on the daily lives of officers working the road. I can't tell you how many uniform pants I've ruined over the years from flare burn holes, but with the Road Commander lights, that's now a thing of the past. Thank you for creating such an outstanding product!

JOSEPH I. BAILEY ,
SUPERVISOR & AIRFIELD ELECTRIC
ORLANDO INTERNATIONAL AIRPORT

This is the most versatile light for use with safety cones I have ever used. It deploys easily and has multiple lighting color options and sequencing patterns. I work for the Aviation Authority at Orlando International Airport and when we do electrical work on the airfield at night, we have to be in compliance with FAA regulations as they pertain to closures. This fantastic tool ensures our safety as well as the safety of the traveling public. The best part is that this setup replaces the need for heavy barricades which leech away valuable time needed for the task at hand. So, in summary; safety enhancing, versatile, rapid deployment, faster setup and no more water filled barricades.

TONY DATI
STREETS SUPERINTENDENT
VILLAGE OF NILES PUBLIC WORKS DEPARTMENT

I'm extremely satisfied with the Nite Beams product line. My staff had the chance to check them out at a trade show and instantly recognized all the ways we could use these products. That same week, we purchased two complete kits and decided to permanently keep them in most of our vehicles. They're compact, easy to use, and incredibly bright—a fantastic safety device to ensure the safety of you and your crew.

JAMES L BURKS
SAFETY OFFICER
MISSISSIPPI DEPARTMENT OF TRANSPORTATION

I just wanted to give a big shutout to Nite Beams™ for the well-designed and brightly lit nighttime Class 3 Safety Vest. We've been using your product for a year now, and all of my field crews feel much safer working on roadways during night hours. Thank you for your hard work in designing and providing a comfortable vest for our crews—they absolutely love them!

FLAUDE DILLON PE 161
CRASH RECONSTRUCTIONIST
LOGANSPORT, IN POLICE DEPT.

I am a crash reconstructionist in north-central Indiana, and I recently used five Road Commander lights at a crash scene to block a highly traveled roadway—they worked phenomenally. These lights are incredibly bright and visible both day and night. We were on scene for several hours, and all five lights performed flawlessly the entire time. Officers from assisting agencies who witnessed their effectiveness are now planning to purchase their own sets of Road Commanders. These lights also freed up patrol cars and officers who would have otherwise been needed to direct traffic. An excellent tool for improving safety and efficiency!

BEN JONES, TROOPER
INDIANA STATE POLICE

Nite Beams' Road Commanders works great! I gave your information to two other people.

RYAN GAGNON, DEPUTY CHIEF OF POLICE
AUBURN HILLS POLICE DEPT., AUBURN HILLS, MICHIGAN

The 'Road Commander' LED flares produced by Nite Beams have dramatically improved the safety and visibility of our officers in the field. I put these in the hands of our officers, and they immediately deploy them on crashes, both day and night, on over 10 miles of freeway that runs through our community. What I did not expect is these have been a force multiplier when having to shut down roads. A five-pack of 'Road Commander' flares can take the place of a patrol car to block a road and improve the efficiency of resources in the field.

DAVID HARPER, SAFETY SPECIALIST
YATES CONSTRUCTION

We ordered the 5-pack Road Commander package a couple of months back and were able to put them to work last night on our road work project (lane closure) with great success. Immediately, we noticed a difference in traffic moving over and slowing down prior to coming into the taper of the lane closure. I immediately ordered another set to assist in protecting our workers in the work zone. The LED headbands we ordered were also a great hit with our employees—lightweight and easily managed. Great investment.

DR. MARK FRENCH, CSP, CHIEF HUMAN RESOURCES OFFICER
DALKIA SOLUTIONS

I was impressed with the Road Commander technology at the ATSSA booth and purchased some for trial. After my team received the product and tried it out, I made a second order of triple the quantity. Keeping my team visible while working roadside is critical, and this product is a huge help.

MICHAEL OCHS, SAFETY DIRECTOR
Q&D CONSTRUCTION

As the safety director for a large construction company, I set out to find safety items after a serious accident in one of our work zones at night. We needed something that would help our employees be seen beyond the typical reflective striping on their vests.

The search led to Nite Beams and their line of products that increase visibility by adding LED lighting to the standard safety equipment. The team at Nite Beams was able to customize the products to meet our needs for all of our traffic management crews.

Looking into the products further, we were very impressed by their quality, and our employees are happy to use them. The increased visibility in traffic, as well as the LED lighting for our crews working at night, has been a tremendous benefit for the safety of our team.
The team at Nite Beams has been great to work with. They had no issues when we wanted to make changes to stock items and always responded quickly. If you are looking for a way to keep your workforce safer and more visible at night, I would recommend you reach out to the team at Nite Beams and see how they can help your organization.

DOUGLAS C. WINGS, ADMINISTRATIVE LIEUTENANT
EASTERN MICHIGAN UNIVERSITY, DEPT. OF PUBLIC SAFETY

I want to thank you for coming to my department to show us your products, especially the Road Commander Electronic Flare. The design and versatility of this flare, along with its ability to protect our officers from injuries due to lack of visibility and burns, is an innovation that has long been needed.

Another positive aspect of this product, especially since I work on a college campus and people pay close attention to these matters, is that it reduces our carbon footprint, not to mention our budgetary costs over time. We have multiple events every year and go through boxes of road flares. This ongoing expense rises every year, but the Road Commander Flares are rechargeable, reusable, and pay for themselves in a very short time.

After your presentation, I convinced our Chief to purchase 10 sets, one for each car. The ordering process was simple, and we received our entire order quickly. Out of the 10 sets, I had a small issue with one flare. I called you, and you shipped out a replacement the next day. That is great customer service.

Thank you for bringing this product to market. There are other electronic flares out there, but in my personal opinion, they do not function as well as your Road Commander.

JOSEPH W. GREGORY
CHIEF OF DEPARTMENT, ALBANY FIRE DEPARTMENT

I wanted to send a quick note to express my thanks for your support in bringing the WorkLight Commander lights to our Albany Fire Department.

The Albany Fire Dept. Purchased 18 WorkLight Commanders which we distributed and placed in service on our Ladder Companies and Safety Division apparatus. These new work lights were critical, almost immediately, after placing them in service during back-to-back vacant building fires. The portability and ease of use were extremely helpful to our members, as the enhanced a safe operation around the fire ground.

JUSTIN LAURIA #244, PATROL LIEUTENANT
VILLAGE OF LINCOLNWOOD POLICE DEPARTMENT

Our department has equipped all squad cars with Nitebeams LED road flares, and they have become an essential tool for traffic management. We use them regularly at crash scenes, where their bright, highly visible lights significantly enhance officer safety and improve traffic flow. These flares are durable, reliable, and incredibly effective, making them a vital addition to our safety equipment.

BOBBY TUTTLE, OWNER
COMPLETE INCIDENT RESPONSE TRAINING (C.I.R.T.)

I first met Mike "Tonto" Alexander at an American Towman towing industry trade show many years ago. As I walked by the Nite Beams' booth, his LED lighted safety vest caught my attention. Which is exactly what it was developed to do! Get the attention of motorists driving by roadway workers, including tow operators.

At that time, the LED lighted safety vest was Nite Beams' main product. I remember telling Tonto that he was probably the most important exhibitor of that trade show.

As a training instructor for the towing industry, one of the most important topics in all my training classes is Roadway Safety.

Providing information on Roadway Safety products and tactics is a core part of all CIRT's training classes. Over the past years I have continued to watch Tonto and Nite Beams continue to develop new products focused on saving roadway workers' lives. Thank you, Tonto, for your passion, for protecting the countless men and women exposed to moving traffic on our Nation roadway's 24/7/365.

Bobby Tuttle, Owner
Complete Incident Response Training (CIRT)
