

NITE BEAMS PRODUCTS | PREVENTING ACCIDENTS, SAVING LIVES

WHAT MAKES SENSE.

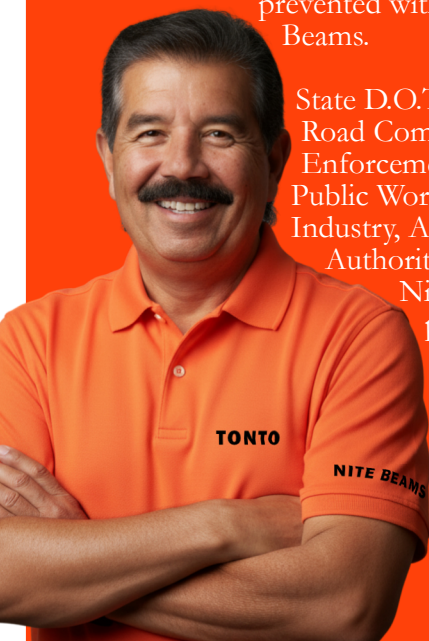

Continue using only reflective tape—technology that's over 100 years old—and hope a distracted or speeding motorists see you? Why risk a worker's life? Invest in today's LED technology and create safer work zones for both road workers and motorists.

Current data reports that over 100 road workers, over 50 police officers, and over 70 tow operators are killed each year while working on roadways, with hundreds more injured. Most of these incidents could be prevented with the use of Nite Beams.

State D.O.T.s., Road Builders, Road Commissions, Law Enforcement, Fire Depts., Public Works Depts., Towing Industry, Airport/ Port Authorities have chosen Nite Beams to protect their workers and assets.

When will you?

Mike "Tonto" Alexander
(President & Founder)

PREVENTING ACCIDENTS, SAVING LIVES

NITE BEAMS

THE SOLUTION

WHY RISK AN EMPLOYEE'S LIVES OR YOUR ASSETS?

Protect your workers and assets and secure a safe work zone.

Every day Public Workers are struck by motorists. The NSC reports in 2023 there were 898 fatalities in work zones. Nite Beams Cone Commanders are now being used by Public Works, Fire Dept. Law Enforcement and others to alert motorists to prevent these type of incidents.

BRAD KENNEDY, POLICE CAPTAIN
REDFORD TOWNSHIP POLICE DEPT.

We purchased several Road Commander Road Flare kits with tripods from Nite Beams™ for a trial run with our Traffic Bureau with excellent results. The Flare kits have extremely high visibility in the day time as well as the night. These Nite Beams Flare kits have been used on numerous major crash scenes including fatality crashes. We are able to free up patrol cars on crash scenes now due to being able to set out these long lasting and bright Flares. This product has high visibility from long distances and increases the safety of the public and of our Officers while they are investigating crashes. We are very pleased with the Road Commander Road Flares from Nite Beams. I am so happy with the product that I have just placed an additional order for more of the Road Commander Road Flares for our Road Patrol.

INCREASE SAFETY IN WORK ZONE

Outdated standalone reflective cones are 100 Years old technology.

Nite Beams' Road Commander greatly enhances the safety of road workers and motorists. It's today's technology!

TONY DATI
VILLAGE OF NILES PUBLIC WORKS DEPARTMENT

I'm extremely satisfied with the Nite Beams product line. My staff had the chance to check them out at a trade show and instantly recognized all the ways we could use these products. That same week, we purchased two complete kits and decided to permanently keep them in most of our vehicles. They're compact, easy to use, and incredibly bright—a fantastic safety device to ensure the safety of you and your crew.

PREVENT SECONDARY ACCIDENTS

Road Commander greatly enhances the safety by alerting motorists well in advance of incidents providing ample time to slow down and move over.

NICK ROSCOE, PRESIDENT
DR. HOOK TOWING SERVICES

Dr Hook Towing Services attends to over 100,000 requests for roadside assistance annually. Our fleet of over 100 towing and recovery units of all sizes operates 24/7/365. Each vehicle is equipped with a set of Nite Beams.

Drivers establish a safe work zone using Nite Beams and traffic cones. To date, nothing we deploy to increase motorist awareness and operator safety comes close to your Nite Beams lighting.

Our operators utilize the Red/Blue configuration on the lights, and when deployed on the roadways, our operators report that they are a game changer in raising awareness to passing motorists. This product should be on every vehicle that works on the roadways.
